CarolAnn, attached is the updated glyphosate file in track changes. For any other correspondence on this please let reach out to Billy as he will be in the office tomorrow.

Thanks
Elissa

We will do the best we can to turn these around today, but some may take some additional time due to staff availability. As we discussed, some of our experts have already left for the holidays.

Dear OPP – Rick just clarified my thinking. The result is good news from a timing perspective for some of the papers. The only one-pagers I need to finalize today are:

- Glyphosate (see my attached questions: I think this is the only action item)
- Neonics
- Chlorine gas
- 1,3-D
- Irgarol – I think this one is done.

Unless Alex has comments, I plan to submit these version to Derrick for the Administrator's notebook (except for Glyphosate, which I need you to review).

The other papers I bombarded you with yesterday will go only to Alex, not the Administrator. Don't worry about my questions (from yesterday) until early January. They are:

- Propargite
- Starlicide
- Diquat

Thanks, all.

Subject: Follow-up to 12/16 Upcoming OPP Actions Discussion: FY20 Q1 Registration Review Package

As a follow-up to Monday's discussion, attached are the one-pagers and one-paragraphs for the upcoming registration review actions for December 2019 and January 2020.

The first page of the attachment is organized by FR Notice, to help line up our path forward with the conclusions from Monday's discussion.

Note that the OCSPP-IO has seen the fact sheets for: Heavy-duty wood preservatives, irgarol, 1,3-D, chlorine gas, neonics, pyrethroids, triazines, soil fumigants, and glyphosate. We have not received any comments from the OCSPP-IO on the fact sheets for propargite, diquat, or starlicide.

Hopefully this will facilitate moving the associated FRNs forward according to the path we discussed on Monday.
